

MEMBERSHIP OF AIMH UK

The UK's leading membership group for all Infant Mental Health Practitioners.

Our mission is to promote understanding of why infant mental health (MH) is important and to support the continuing professional development of all practitioners, early years workers, educators and students working to improve outcomes for parents, babies and toddlers.

AIMH UK, which was founded in 1996 and is an affiliate of the World Association for Infant Mental Health (WAIMH), is a not-for-profit organisation and our primary function is to contribute to the raising of standards of MH practice. We do this by offering resources, CPD events and access to local hubs, which support the UK community of infant mental health practitioners and early years workers to increase their knowledge and skills in infant mental health.

AIMH UK advocates for babies by engaging with government and other national / international organisations and forums, and supports all practitioners working across the perinatal period and early years.

By joining AIMH UK practitioners will be able to develop their knowledge, skills and confidence in MH, access a wealth of specialist information on the AIMH UK website and connect with their local AIMH Hub.

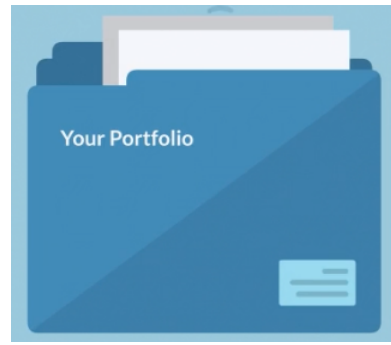

Practitioners will also be further contributing to the early social and emotional wellbeing of babies by encouraging universal awareness of the importance of MH for healthy infant development.

THE AMH UK CONTINUING PROFESSIONAL DEVELOPMENT PROGRAMME

'Promoting excellence in infant mental health practice'

AMH UK Supports Practitioner Development:

- Use the Continuing Professional Development Program to build your individual MH portfolio.
- Submit your completed portfolio for peer review.
- With successful review your name will be added to the AMH UK MH Recognition Register

To build your MH portfolio you will be asked to provide evidence in support of your working practice in and around infant mental health. Your knowledge, skills and behaviours will be validated against the UK MH Competency Framework.

The AMH UK MHCF involves 3 levels of expertise:

Level 1 Portfolio is for practitioners who work, for example, with infants in child care settings or who work with the parent-infant dyad under supervision.

Level 2 Portfolio is for regulated practitioners who work autonomously with the parent-infant dyad, supported by supervision, for example, parent-infant psychotherapists, Health Visitors, psychologists, Social Workers.

Level 3 Portfolio is for regulated practitioners who deliver specialist services to parents and infants with, for example, responsibility for managing a specialist team, providing training and supervision of other practitioners; and in forming and implementing service development, protocols and policies at organisational and regional levels.

The MH CPD system can be used for a number of purposes:

- To gather the evidence to compile their Infant Mental Health Portfolio for registration to the UK Infant Mental Health Recognition Register;
- To self-assess their current level of infant mental health proficiency and identify areas for continuing professional development;
- To provide evidence for revalidation with their individual professional body;
- To provide practitioners who are not required to be on a statutory professional register, recognition of their infant mental health skills and knowledge.

Support and mentoring packages for your team to work through the MH CPD System and gain access to the Recognition Register are offered by AMH UK. To enquire further please contact info@amhuk
